ACKNOWLEDGEMENTS	I
PREFACE.....	II
CONTENTS	IV
1 ENERGY AND THE SOCIETY	1
1.1 The energy system today	1
1.1.1 Overview.....	1
1.1.2 Statistical data.....	3
1.2 The energy system in a historical review	5
1.2.1 Mechanical energy as useful energy	5
1.2.2 Heat and cold as useful energy	9
1.2.3 Light as useful energy.....	10
1.2.4 Energy system.....	11
1.3 The energy system in the future	11
1.3.1 Challenges.....	11
1.3.2 Options.....	13
2 ENERGY ESSENTIALS	15
2.1 Energy quantity and form.....	15
2.1.1 Quantity	15
2.1.2 Form.....	18

2.2	Types of processes and their characteristics.....	33
2.2.1	Types of processes	33
2.2.2	Characteristics of processes	34
2.2.3	Efficiency at a closer look.....	38
2.3	Energy quality - work and heat	39
3	ENERGY CONVERSION.....	45
3.1	Basics.....	45
3.2	Technology – single step: materials and components	46
3.2.1	Mechanical energy ↔ mechanical energy	48
3.2.2	Thermal energy ↔ mechanical energy	54
3.2.3	Chemical energy ↔ thermal energy	57
3.2.4	Chemical energy ↔ mechanical energy	57
3.2.5	Nuclear energy → thermal energy	58
3.2.6	Thermal energy ↔ thermal energy	59
3.2.7	Electrical energy ↔ mechanical energy	60
3.2.8	Electrical energy ↔ thermal energy	61
3.2.9	Electrical energy ↔ magnetical energy	62
3.2.10	Magnetical energy ↔ mechanical energy.....	64
3.2.11	Chemical energy ↔ electrical energy	65
3.2.12	Thermal energy ↔ electromagnetical energy (incl. light)	68
3.2.13	Electrical energy ↔ electromagnetical energy (incl. light)	70
3.3	Technology – multiple steps: devices and engines.....	73
3.3.1	Thermal energy ↔ mechanical energy	75
3.3.2	Mechanical energy ↔ electrical energy.....	82
3.3.3	Electrical energy ↔ electrical energy	85
3.4	Technology – multiple steps: plants	86
3.4.1	Nuclear energy → electrical energy.....	88
3.4.2	Electromagnetical energy (light) → electrical energy	89
3.4.3	Chemical energy → electrical energy	91
3.4.4	Mechanical energy → electrical energy.....	94

4	ENERGY STORAGE	97
4.1	Basics.....	97
4.2	Technology - direct energy storage	102
4.2.1	Thermal energy	102
4.2.2	Mechanical energy.....	104
4.2.3	Electrical energy	105
4.2.4	Magnetical energy.....	106
4.2.5	Electromagnetical energy (light).....	107
4.2.6	Chemical energy	107
4.2.7	Nuclear energy.....	108
4.3	Technology - indirect energy storage	108
4.3.1	Thermal energy	108
4.3.2	Mechanical energy.....	111
4.3.3	Electrical energy	111
4.3.4	Magnetical energy.....	120
4.3.5	Electromagnetical energy (light).....	121
4.3.6	Chemical energy	122
5	ENERGY TRANSPORT	123
5.1	Basics.....	123
5.2	Technology – direct energy transport.....	124
5.2.1	Thermal energy	126
5.2.2	Mechanical energy.....	129
5.2.3	Electrical energy	130
5.2.4	Magnetical energy.....	131
5.2.5	Electromagnetical energy (light).....	132
5.2.6	Chemical energy	133
5.2.7	Nuclear energy.....	134
5.3	Technology – indirect energy transport.....	134
5.3.1	Thermal energy	134
5.3.2	Mechanical energy.....	137

5.3.3	Electrical energy	137
5.3.4	Magnetical energy.....	138
5.3.5	Electromagnetical energy (light).....	138
5.3.6	Chemical energy	138

6 THE ENERGY SYSTEM AS A NETWORK OF TECHNOLOGIES 139

6.1	Introduction.....	139
------------	--------------------------	------------

6.2	Basics.....	140
------------	--------------------	------------

6.3	The energy system as a combination of networks	142
------------	---	------------

6.3.1	Networks – single, simple ones	142
-------	--------------------------------------	-----

6.3.2	Networks – two networks and their connection	143
-------	--	-----

6.3.3	Networks - the energy system as a whole	144
-------	---	-----

6.3.4	The networks for thermal energy	146
-------	---------------------------------------	-----

6.3.5	The networks for electrical energy.....	148
-------	---	-----

6.3.6	The networks for chemical energy (= fuels)	152
-------	--	-----

6.3.7	The network for nuclear energy (= fuel)	153
-------	---	-----

6.4	Current challenges and options	154
------------	---	------------

6.4.1	Optimization options.....	155
-------	---------------------------	-----

6.4.2	Optimization criteria and interest groups.....	162
-------	--	-----

7 APPENDIX 163

7.1	Prefixes	163
------------	-----------------------	------------

7.2	Units	164
------------	--------------------	------------

7.3	Conversion factors	167
------------	---------------------------------	------------

7.4	Constants	168
------------	------------------------	------------

7.5	Nomenclature	168
------------	---------------------------	------------

8	DEFINITIONS OF TERMS.....	171
9	REFERENCES	175
10	ADDITIONAL INFORMATION.....	177
1	Energy and the society.....	177
2	Energy essentials.....	179
3	Energy conversion	180
4	Energy storage	183
5	Energy transport.....	185
6	The energy system as a network of technologies.....	186
